Call for Tender - Evolution of Structural Eurocodes

Call for Tender for experts for the development of the second generation of Structural Eurocodes

**Deadline for tenders: 2015-05-25 (5.00 pm CET)**

The Eurocodes (EN 1990 – EN 1999) enable the design of building and civil engineering works, and comprise 10 series of Standards in 58 parts. When they were published, prior to 2007, the first generation of EN Eurocodes were the most comprehensive and technically advanced suite of standards for structural and geotechnical design in the world. Their development was a tremendous achievement and represented the culmination of over 30 years collaborative effort. Their impact has been considerable. It has been estimated that they affecting the work of around 500 000 professional engineers across Europe.

The European Commission (EC) has recently granted funding (SA-CEN 2014-02) for phase 1 of a detailed standardization work programme, leading to the development of the second generation of EN Eurocodes.

The purpose of this call is to appoint experts to form the Project Teams for the twenty-five tasks in Phase 1 of CEN/TC 250 ‘Structural Eurocodes’ Work Programme. Project Teams are expected to comprise a Project Team Leader and five project team members. Appointments will be made on an individual basis. Tender responses must therefore be for individual experts. Tender responses for teams will not be considered.

For more information see the [Call for tender](#).

The deadline for submission is 25 May 2015 until 5.00 pm CET. Submissions and queries have to be sent to [M515Eurocodes@nen.nl](mailto:M515Eurocodes@nen.nl).
